## Work Experience

---

### Laravel Developer

Meu Câmbio - Belo Horizonte, MG

January 2018 to Present

Development of web systems for the financial area. I am responsible for the 3 exchange systems, namely Tourism (where foreign currency is made for the individual client), Commercial (buying and selling foreign currency resources between companies through auction, generating pdfs for financial institutions) and o Virtual Visit where, as the name implies, it is responsible for the compliance part of financial institutions that want to trade foreign exchange through visits made with the cell phone, and managed by a backend. Technologies used. Laravel, AWS, Mysql on RDS, MongoDB, Vuejs, Redis in addition to several integrations with third-party services (generating bills, exchange quotes, digital document signature, etc.)

### System Analyst

4yousee - Belo Horizonte, MG

January 2018 to October 2018

Fullstack developer in a solution for digital signage, working mainly in the development of new projects, such as our Marketplace, which allowed the sale and integration of applications developed by third parties in our platform, as well as various integrations with other clients and platforms

### General Manager

GRUPO AF - Belo Horizonte, MG

November 2012 to January 2018

Family-owned company, in the construction industry, we build small buildings (up to 10 units). I am responsible for all the management of the project, from the preparation and approval of the projects, construction, cash flow, human resources, quality control, sales, etc

### Software Engineer

CI&T Software SA - Campinas, SP

September 2012 to June 2013

I accepted the challenge of living in another city and I was a software engineer for one of the fastest growing companies in Brazil. It served Johnson & Johnson USA, and was responsible for determining the approach that would be used in the sites, considering the high traffic and peculiarities of each project and the client, always attentive to performance, and being compliance with a global company. Because of the complexity of the projects, an unconventional approach was needed when we thought of ordinary sites, such as running load balance, integration, and consumption tests for other Johnson systems.

### Systems Analyst

IBM - Belo Horizonte, MG

May 2009 to October 2011

After closing my company, and with the doors open at IBM, I decided to go back to the company, this time working with low platform (web development), where I could work side by side with management, developing tools to improve employee control and productivity of the Oi account (Telemar Client)

### **Owner**

Meu Assistente - Belo Horizonte, MG

January 2008 to January 2011

Seeing a need in the market, I decided to undertake a company focused on the medical offices, with a focus on automating them. The service was mainly aimed at replacing or complementing the activities of the secretary within the office, making her role (marking consultation, clearing, sending SMS to patients, contacting the doctor, etc.). The company came to have 12 employees, being managed by me, but due to the high costs with personnel and telecom, was discontinued. The acceptance of the product was excellent and even having closed the company, it currently runs in a doctor's office, being used by 5 doctors, in different locations, being managed only by one secretary.

### **Systems Analyst**

IBM - Belo Horizonte, MG

January 2007 to February 2008

Specialist in Telecommunication Systems, client Telemar. Responsible for the understanding of demands and projects, as well as the construction, testing and implementation of the same. Continuation of what was done in the CPM (below), because the client and the needs were the same.

### **Analista de Sistemas**

CPM Tecnologia em Informação - Belo Horizonte, MG

June 2004 to January 2007

After undergoing training offered by the college, and obtaining one of the highest grades in a class of 60 students, I was invited to work at CPM, a Bradesco and Deutsche Bank company that provided services for Telemar in Belo Horizonte. In a short time I become a specialist in billing system, acting as Technical Leader in several projects, and was also a plantonist of the billing and collection system of one of the largest telecoms in Brazil.

### **Systems Analyst**

Unicentro Newton Paiva - Belo Horizonte, MG

April 2000 to July 2004

Although it was my first job, I still had several responsibilities, which helped shape me into the professional I am today. Although he had just joined the college of Computer Technology, I was responsible for the college's Distance Learning system and was responsible for keeping the server up and running (Linux + Oracle 8i). I learned to develop in Delphi + SQLServer, I was responsible for the servers of the students in the Catalão campus (13 thousand users) and it did service to the students in the computer lab, taking their doubts regarding the use of windows, word, etc. It was at this time that I started programming in PHP, language today that I master and am certified

## Certifications and Licenses

---

### **Certificação PHP 6**

January 2007 to Present

## Additional Information

---

Web programmer with 20 years of experience, the last 4 working, as a home office, with the laravel/vuejs stack.

The exchange rate difference is favorable for both, as they can pay for a senior professional, capable of working alone or in a group and who loves to deliver value to clients.

I love new and challenging projects, I'm available for interviews 24/7, and I'm willing to work for a while to prove my worth before we sign a deal.
